SUMMARY

Python Backend Developer with experience building scalable web applications, REST APIs, and business automation solutions using Django, SQL, and Python. Skilled in backend development, API integration, database-driven applications, and cloud deployment. Experienced in developing production-ready software, integrating third-party services, and collaborating with stakeholders to deliver reliable solutions. Passionate about writing clean, maintainable code and continuously learning new technologies.

WORK EXPERIENCE

Global Trading Company

Jan 2026 – Present

Data Analyst & Software Developer

- Analyzed large operational and sales datasets using SQL and Python to identify trends, improve reporting accuracy, and support strategic business decisions.
- Developed interactive Power BI dashboards to monitor KPIs, operational performance, and financial metrics.
- Automated reporting workflows using Python, reducing manual effort and improving reporting efficiency.
- Performed data validation, cleansing, and quality checks to ensure accurate and reliable reporting.

PROJECTS

CookMate: AI-Powered Smart Kitchen Assistant

- Built a privacy-first AI kitchen assistant using Django and a local RAG pipeline, offering personalized meal planning based on dietary preferences, allergies, and fitness goals with integrated grocery management and nutritional tracking.

SmartHire AI: ATS Resume Analyzer (*In Development*)

- Developing a full-stack AI-powered platform with secure resume upload, private Supabase storage, ownership-verified backend retrieval, structured AI resume parsing, and an AI-driven interview preparation module, built with a production-grade layered architecture separating frontend, backend, database, and AI processing.

Sales Operations & Business Reporting Platform

- Developed a centralized automation system for a food supply company featuring centralized reporting system, operational documentation generation, agent-wise executive business reports, and real-time commission tracking, with planned Power BI and AI chatbot integration.

Microsoft Power BI Dashboard

- Collected, cleaned, and integrated multi-source data to build interactive Power BI dashboards with dynamic KPIs and slicers, delivering actionable insights for strategic decision-making.

WhatsApp AI Chatbot (n8n)

- Designed and deployed a WhatsApp chatbot integrating n8n, Gemini API, and WhatsApp Business API with dynamic AI agent routing, automated Google Sheets logging, and cloud hosting on Render.

EDUCATION

Khawaja Fareed University of Engineering & Information Technology (KFUEIT)

2022-2026

Bachelors of Science in Data Science

- Data acquisition, preprocessing, big data systems, image processing and exploratory analysis
- Machine learning, core Data Analysis foundations and applied analysis

SKILLS

Data & Analytics: Python, SQL, Excel, Pandas, Matplotlib, Power BI, DAX, Data Analysis, Data Visualization

Automation & Development: n8n, Django, Git, Workflow Automation, REST APIs, Vercel, GitHub, PostgreSQL, REST APIs, RAG Pipelines, LLaMA, Ollama,

Business & Marketing: Amazon FBA, SEO, Google Ads, Meta Ads, WordPress, Client Acquisition, Stakeholder Communication
