SUMMARY

Software developer with a growing focus on automation, building AI-powered web apps, backend systems, and workflow integrations that solve real business problems. Skilled across Python, Django, react, SQL, and REST APIs, with hands-on experience integrating LLMs and RAG pipelines into production tools. Uses n8n and Zapier to automate operational workflows alongside the software built for clients.

WORK EXPERIENCE

Global Trading Company

Jan 2026 – Present

Business Analyst & Software Developer

- Led data analysis and developed a fully automated internal business software system, data entered once auto-updates all reports, summaries, and calculations identifying key areas for sales growth and cost reduction through historical trend and customer behaviour analysis.
- Planned Power BI dashboard and AI chatbot integration for real-time insights and operational efficiency, improving data accessibility, streamlining workflows, and contributing to strategic planning for sustainable growth.

Eminent Ecom

Jun 2022 – Mar 2023

Amazon Specialist

- Managed Amazon seller accounts across FBA operations, inventory, and store performance, optimizing listings through keyword research and SEO to improve organic rankings and drive sales growth.

PROJECTS

CookMate: AI-Powered Smart Kitchen Assistant

- Built a privacy-first AI kitchen assistant using Django and a local RAG pipeline, offering personalized meal planning based on dietary preferences, allergies, and fitness goals with integrated grocery management and nutritional tracking.

WhatsApp AI Chatbot (n8n)

- Designed and deployed a production-ready WhatsApp chatbot by integrating n8n workflows with the Gemini API and WhatsApp Business API, enabling real two-way customer communication with dynamic AI agent routing, automated Google Sheets logging for record-keeping, and reliable cloud hosting on Render.

Automated Business Software for Sales Agents

- Developed a centralized automation system for a food supply company featuring single-entry data propagation, delivery challan generation, agent-wise financial summaries, and real-time commission tracking, with planned Power BI and AI chatbot integration.

Microsoft Power BI Dashboard

- Collected, cleaned, and integrated multi-source data to build interactive Power BI dashboards with dynamic KPIs, filters, and slicers, delivering clear visual insights that supported strategic decision-making for stakeholders.

EDUCATION

Khwaja Fareed University of Engineering & Information Technology (KFUEIT)

2022-2026

Bachelors of Science in Data Science

- Data acquisition, preprocessing, big data systems, image processing and exploratory analysis
- Machine learning, Deep Learning, core Data Analysis foundations and applied analysis

SKILLS

Data & Analytics: Python, SQL, Pandas, Matplotlib, Jupyter, Power BI, DAX, Data Modeling, Data Analysis

AI & Machine Learning: Machine Learning, Deep Learning, NLP, RAG Pipelines, LLaMA, Ollama, TensorFlow/Keras

Automation & Development: n8n, Django, Git, Workflow Automation, REST APIs

Business & Marketing: Amazon FBA, SEO, Google Ads, Meta Ads, WordPress, Client Acquisition, Stakeholder Communication
